  - Customizable any shape and size
  - Closest lightstick will change colors and trigger outputs
- WiFi/Bluetooth/Ble Connectivity
- External triggers
- Expansion boards available
  - Relay expansion
  - LED driver expansion
  - Audio player expansion

## Product Overview

Using custom programmed RGB Lightsticks in conjunction with the ArtistryVare UI100 Universal Interface provides a simple interactive that will delight and entertain. As the light stick approaches the UI100 location, the color will change indicating that it is in proximity of an interactive. Moving closer will trigger one or more of the many UI100 outputs and change the color of the lightstick again to let the guest know that they have triggered. Using the built-in WiFi or a physical output, the UI100 can interface with Animatronics, AV media, Special Effects, Show Action Equipment or any other element.

## Product Application

Customize the housing any way you want - Sticks, Wristbands, Custom Logos. The electronics required are small and can be fit into almost any shape and size, with or without light. Using the built in customized protocol, you can interface the lightsticks with any bluetooth device for a variety of applications.

## About ArtistryVare
